

A device for heating the wax during the depilation treatment. It has a digital display. The temperature can be adjusted from 30 to 125 degrees Celsius.

digital display

*Temperature adjustable
from 30 to 125 ° C*

As standard, it is suitable for heating cans with wax.

Inside there is a container with a capacity of 500 ml for heating wax in the form of cubes, pearls, or any other. After heating, the plastic handle will help to remove the container from the device. The lid is transparent and has openings for steam.

Perfect for use in a beauty salon and at home.

wax heating

*For heating the wax
in pearls, cans and cubes*
