

iWAX

Hair removal devices and accessories

The **iWAX** brand aims to provide multifunctional tools for cosmetic wax and paraffin treatments, such as state-of-the-art hair removal wax heaters. It focuses on interesting design, product versatility and ease of use, making the iWAX range aimed at both professional and home use.

Universal can and hard wax warmer

The **iWax wax warmer** enables wax to be properly and quickly prepared for depilation. **Designed for 500 ml tins and hard waxes**, it provides the convenience and freedom to choose the form of epilation. The high-quality plastic housing is **easy to clean** and the transparent lid allows you to monitor the melting process at all times.

Precise temperature and running time adjustment

The temperature and running time are set using **intuitive function buttons**, allowing you to precisely adjust the settings to the specific treatment and type of wax used. The **temperature control range from 35°C to 125°C** allows you to precisely adjust the heating intensity to the type of wax and the specific treatment. The device is suitable for both professional work and everyday salon use.

Universal wax heater

Designed for 500 ml cans and hard wax, it ensures quick and convenient wax preparation for hair removal treatments.

Modern display and practical facilities

The **easy-to-read display** shows all parameters in real time, making it easy to monitor settings and use the device. The heater **switches on at the press of a single touch button**, accompanied by a short beep. Pressing again switches the unit off, generating three confirmation beeps. The beep also occurs whenever the settings are changed, **providing full control over the operation of the equipment**. The aluminium container with a comfortable handle **supports the maintenance of the appliance**, increasing the comfort of daily use.

Intuitive control

A clear parameter display and single-button operation provide full control of the device.

Practical solutions

The minimalist, modern form **inspired by the shape of an apple** gives the device a unique character, and **the compact dimensions** make it look good in any beauty salon. The warmer is made of durable plastic in elegant shades of black, which is **resistant and easy to clean**. The transparent lid **makes it possible to monitor the melting process of the wax**, and the small openings placed in the lid act as ventilation, protecting the device from overheating. **The stable construction and non-slip feet** ensure a secure positioning, ensuring safety and comfort during use.

How to clean the wax warmer?

- 1) Do not use solvents or strong detergents.
- 2) Always unplug the unit before cleaning.
- 3) Do not immerse the unit in water.
- 4) Do not use sharp tools to remove residues.
5. use a dedicated wax residue remover for cleaning.
