MARATHON K35 MINI

- bit stand
- head holder

Professional device for manicure and pedicure treatments

The high-class **Saeyang Marathon K35 mini nail drill** is a practical device that allows for precise preparation of nails and cuticles, preparing them for further treatments. Using the device **makes it much easier to remove the remains of previous nail styling**. The well-balanced head, compact dimensions, well-thought-out functionalities and a multitude of available options make the nail drill perfect for professional use, especially for mobile services.

HEAD H200

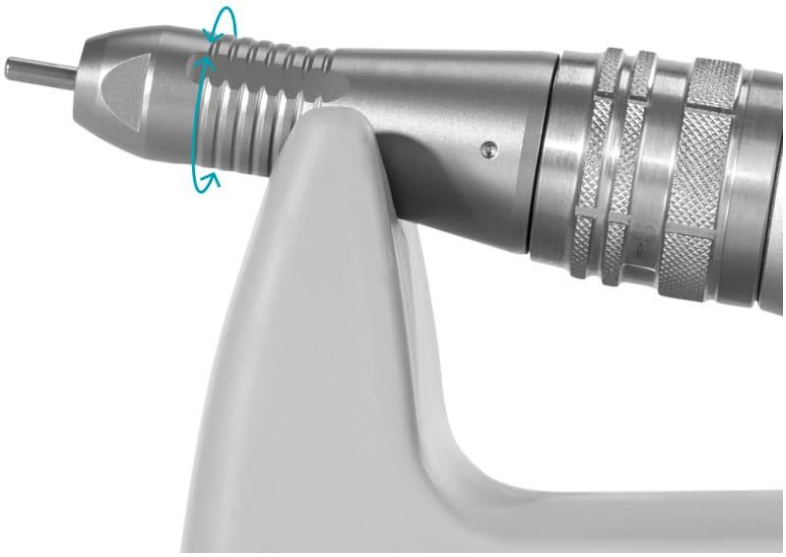

- speed:
  30 000 rpm
- max. torque:
  2,9 Ncm

Practical head H200

The functional, precise **head fits perfectly in the hand**, which guarantees high working comfort. It is equipped with an easy-to-use **Twist-Lock system**, which allows for quick and smooth replacement of bits. This makes working with the device exceptionally **easy and intuitive**, which will also be appreciated by more demanding users. The element is **properly balanced and ergonomically profiled**, and additionally, head **vibrations have been reduced**, so that even many hours of work with the nail drill machine do not tire the hand excessively.

in one motion

Digital display with clear control panel

The nail drill is equipped with a **clear control panel with a digital display**, which plays a key role in monitoring and controlling the operation of the device. The screen informs about the rotational speed at which the unit's head is currently operating to ensure precise and safe operation of the nail drill machine. The speed can be adjusted using a knob **up to 30 000 revolutions per minute**, allowing for customization and therefore and thus comfortably perform a wide range of treatments. System of **smooth rotational direction change** with a built-in pause ensures safe and comfortable switching between both working directions. Additionally, **the control diode lights up in green or red**, making it easier to recognize the direction of operation of the nail drill machine. The control panel also has **a pause function**, which allows the user to stop the device, giving greater control over the process. The solutions used make the operation of the nail drill **intuitive and very effective**.

Precise functionalities for comfort of use

The accessories included in the set ensure **not only safety**, but also comfort of use. During work, the head can be safely placed on **the dedicated silicone stand** included in the set. The place for nail drill bits on the housing allows you to prepare the necessary tools to have them at hand while working. **The overload protection with LED warning signal** protects the motor from overheating, which ensures greater operational safety and protects against damage to the device.

TECHNICAL WARRANTY

we give 12 months technical warranty

Modern, compact device

The small Saeyang Marathon K35 mini nail drill machine is **a perfect example of combining functionality with aesthetics**. The aesthetically pleasing, futuristic casing in shades of white and yellow will fit perfectly into any interior and **will work well even in limited space**. Additionally, the nail drill is equipped with **rubberised feet** that not only ensure stability, but also protect the surface on which it is placed against possible damage. With these features this device not only perfectly fulfills its functions, but also constitutes **an elegant element of interior design**, emphasizing the modern character of any room.
