

Activ Fizjo are high-quality products necessary in every physiotherapist's practice. The brand offers a wide range of products – which improve the work of a physiotherapist and provide comfort to the user – including many variants of folding massage tables or acupressure mats, which can also be used at home.

ACTIVFIZJO

functional equipment for physiotherapy

A comfortable massage table essential in physiotherapy

The **Activ Fizjo Komfort folding aluminum massage table** is a two-segment model with upholstery in shades of pink, which is **perfect for a massage parlour or physiotherapist**, as well as many other specialist practices. The product **does not take up much space**, and with the possibility of easy and quick assembly, the relative lightness of the structure and the matching bag included in the set, it is also **a great choice for mobile services**.

height adjustment

*customizable
to individual needs
needs by
means of telescopic
adjustment
with locking mechanism*

Simple height adjustment mechanism

The height can be adjusted to suit the height and individual needs of the person performing the procedure using a **telescopic adjustment with a locking mechanism**. Each of the table's aluminum legs consists of two tubes, which, after unlocking, can be freely moved relative to each other. **The Fast Lock mechanism** holds components in chosen position when the lock is placed in the appropriate hole. In addition, the structure of the frame is **stabilized with metal cables**, which makes the massage table solid and perfect for a wide range of services.

ergonomic headrest

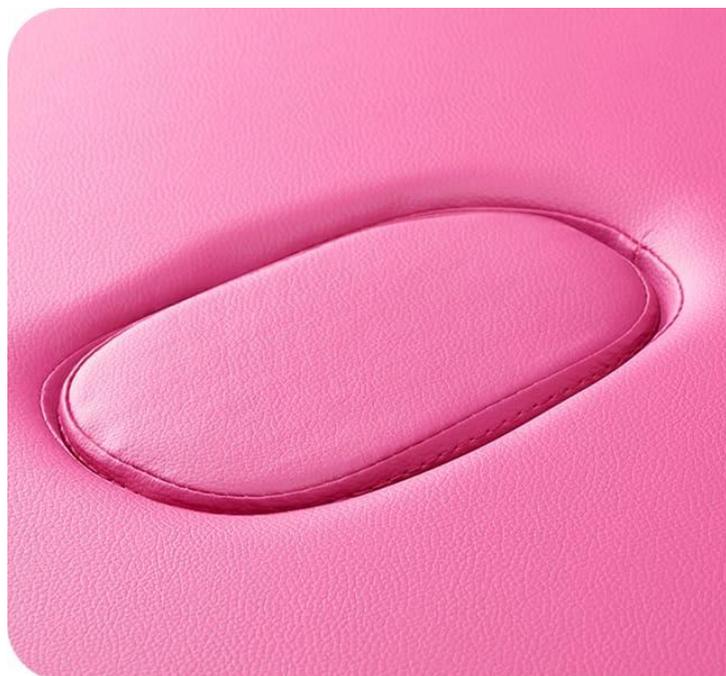

*Adjustable
angle for
individual needs*

Comfort for back treatments

For greater user comfort, the set includes **an easy-to-adjust ergonomic headrest**, which provides excellent head support during treatments. The angles of its position can be **adjusted in two planes**, making it adaptable to individual needs and the specificity of the service performed at a given moment. It can also be easily dismantled and, then when carrying out treatments on the back, **use a special hole in the tabletop**. When not in use, you can cover it with **the included plug**.

hole with a plug

*comfort during a
wide range of treatments,
including those
carried out on the back*

Ergonomic support for the arms

Regardless of the type of treatment being carried out and the position adopted by the user, it is important to **position the arms in the right way**, giving them a chance to relax, while not hindering the treatment. The well-designed solutions for

this model include armrests that are **easy to assemble and disassemble**. In addition, the set includes a **special shelf** that allows you to comfortably arrange the arms also under the head – it will be especially useful during treatments that require a position lying on the stomach. These elements allow to **adjust the table to the service performed at a given moment** and provide high comfort to the user.

arm shelf

*allows arms to
be placed
also under head*

Convenient solutions for mobile services

The **relatively lightweight** design makes it easy to carry, which is perfect for mobile services. **The table can be easily and quickly folded and unfolded**, and additionally it does not take up much space. Under the top there are **special straps to keep additional accessories during transport**. Convenient handles are placed on the sides of the table, allowing the product to be easily repositioned at any time. The set also includes a **dedicated bag**, which makes transport not a problem, but also protects the rehabilitation tables from dirt or damage. The cover has a shoulder strap and a **comfortable handle for easy transport**.

easy to transport*

Energetic pink to make treatments more pleasant

The practical table is upholstered in a **pleasant-to-the-touch imitation of leather** in an electrifying shade of pink, and the filling made of durable foam with appropriate hardness ensures **comfort during treatments**. With the use of such materials, the product is **comfortable to use, durable, waterproof and easy to keep clean**. The legs are made of aluminum, which is characterized by **high resistance to moisture**, making the table is also suitable for places with high humidity, such as locker rooms or sports clubs.
