

iWAX

depilation devices and accessories

The **iWax brand** aims to provide multifunctional tools for cosmetic wax and paraffin treatments, such as modern wax heaters for depilation. It focuses on attractive design, product versatility, and ease of use, which makes iWax's products suitable for professional and home use.

INTUITIVE OPERATION

makes the heater ideal
for both professional
salons and home use

Universal heater for wax

The elegant **iWax Flower heater** is an indispensable tool for **quick and effective wax heating**, ideal for both professional beauty salons and home use. **Simple, intuitive operation** makes the heater a perfect choice for people looking for a reliable and easy-to-use depilation device. **It is versatile** and will work well for products in cubes, and beads.

UNIVERSAL USE

is used to heat wax
in beads and cubes

Practical facilities for the convenience of depilation

The heater is distinguished by its **intuitive operation**, making it simple to adjust the heating temperature by means of an **easy-to-read panel and digital display**. The device defaults to 70°C, with a wide range of adjustment from 35°C to 125°C, allowing you to precisely **adjust the temperature according to the type of wax and your needs**. The heater is indicated by distinctive beeps when it is turned on and off, and the transparent lid allows you to check the wax's melting state while protecting the interior from contamination. The **silicone container** ensures easy and safe melting of the wax, which enhances the convenience of use and facilitates cleaning.

TEMPERATURE ADJUSTMENT

is set to 70 °C by
default, adjustable
from 35 °C to 125 °C

Unique, eye-catching design

The aesthetic of workmanship, unique design, and small dimensions that characterize this wax heater make it **fit perfectly into the modern interiors** of beauty salons, becoming their characteristic element. The elegant **shape inspired by a flower bud** attracts the eye and emphasizes attention to the details – a feature appreciated by both customers and salon owners. The use of durable plastic in shades of pink ensures **ease of cleaning**. In addition, the lightweight construction makes it **easy to transport and move**, making it an extremely practical tool both in salons and at home.

HIGH QUALITY

**aesthetics of construction
and lightweight design
make it easy to transport
and move the heater**

How to use it?

1. Set the device on a flat and dry surface.
 2. Connect the device to the power supply.
 3. Press the middle button to turn on the device.
 4. Lift the lid and put the wax in the device.
 5. Use + and – buttons to set the temperature. The temperature range of the device is from 35 to 125°C. By default, the device is set to 70°C. Holding down the buttons allows you to change the settings faster.
 6. After setting the temperature, wait until the number on the display stops flashing (which means its approval), and then until the device heats up to the appropriate level (the strip under the displayed value stops).
 7. Before the operation, make sure that the wax has completely melted.
 8. Unplug the device when you have finished working.
 9. Wait until the wax cools down before you start cleaning the device.
 10. Clean the device and put it in a dry place.
- CAUTION!** Always check the wax's temperature before applying it to the skin to avoid burning.
