The **Saeyang** brand offers high-quality tools useful when performing professional manicure and pedicure treatments. The Saeyang products, valued among cosmetologists, are characterized by excellent workmanship, precision and the use of innovative solutions.

CYCLONE-VAC

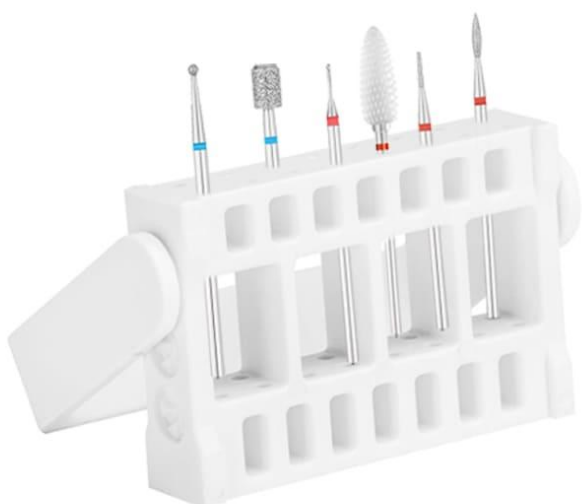

it has an efficient
dust collector and
an intuitive display

Effective podiatric nail drill machine with dust absorber

The Saeyang Marathon Cyclone-Vac – a high-end podiatric nail drill machine with an absorber – is a specialized device that allows you to maintain **high hygiene standards** in the practice, **effectively protecting the health** of practitioners and clients. The professional nail drill machine is designed for pedicures, **especially dry treatment procedures carried out in podiatry**, but it will also work well during manicures. **The efficient head with the absorber and intuitive operation** significantly improve the work of the podiatrist, facilitating the performance of a wide range of treatments.

HELPFUL SET

- › 5 filtrujących worków
- › cleaning device
- › milling cutters with a stand

Clear control panel with LCD display

Intuitive operation guarantees high comfort of use. You can **easily adjust the suction power of the absorber during operation** or turn it off completely. **The speed of rotation of the head is regulated by a knob**, and pressing it can start or put the equipment into sleep mode. In addition, the device allows you **to program up to 3 custom modes**. All parameters are then saved – speed and direction of rotation, level of absorption power – and **can be recalled at any time with a single button**. The easy-to-read display allows you to observe the current settings of the device – **speed and direction of rotation, the level of absorption power**. In addition, after selecting one of the custom operating modes, **the symbol of the activated program is displayed on the screen**. The corresponding icon will also illuminate when it is necessary to replace the filter bag.

HEAD SDE-BHM-40P

- › speed: 40 000 rpm
- › power switch
- › brushless motor

Functional head ensuring work safety

The quiet, ergonomic **head with brushless motor and an adjustable speed range of 4,000 – 40,000 RPM** with an efficient absorber guarantees excellent quality of services and maintaining the highest standards of hygiene, protecting the lungs of both practitioners and clients. **Dust from the treatment area is sucked through the holes in the head directly into the filter**. The ON/OFF switch located on the back of the handle allows you to easily temporarily stop the rotation and suction during operation. This facilitates free operation of the device at any time during treatment. Replacing cutters is easy, which is ensured by **the Push-in & Pull-out mechanism** used – just push the cutter into the sleeve, **without screwing or locking it** – and it is additionally facilitated by the tool included in the set. The head can be easily disassembled **for easy cleaning**. The applied solutions prevent excessive hand fatigue and support comfortable and safe work.

CONTROL PANEL

it has the option to save personalized work programs

Complete set for specialized services

The **practical accessories** included in the set effectively facilitate the work. A **precise head with an absorber and interchangeable filter bags** ensure safe use, protecting against inhalation of harmful pathogens. The kit also includes a **set of cutters**, that will allow you to comfortably perform a variety of pedicure treatments, and a **stand for them made of a special material**, which makes it easy to clean. A variety of shapes, materials and gradations of cutters allow you to choose the right tool for the service being performed at the moment and the area being worked on. The included **tools for cleaning the head and disassembling the cutters** ensure easy maintenance of the device in good condition, making it easier to use.

SUCTION POWER

it has the option to adjust suction power at several levels

Efficient absorber necessary in the work of a podiatrist

Adequate lung protection is the key to responsible and safe work of a podiatrist and maintaining high hygiene standards in the practice. The **high suction power** of the device makes it **perfect for absorbing any dust generated during treatments**. It is also possible to **adjust the absorption on five levels** and, if necessary, to turn off this function.

REPLACEABLE FILTERS

an icon on the screen
notifies about the necessity
of filter replacement

Replaceable filter bags

The set includes **5 dedicated efficient filter bags**. They ensure safe and long-term operation of the device, **capturing and retaining dust** and any particles of material released during podiatric procedures. When the bag needs to be replaced, a **relevant icon appears on the device's display**.

TECHNICAL WARRANTY

we give 12
months
technical warranty

Modern device with a one-year warranty

Aesthetic, futuristic design in shades of white will perfectly fit into any interior. **A special place to put the head down** allows for much more comfortable work, and **non-slip feet** ensure the stability of the device during use. The Saeyang Cyclone-Vac nail drill machine with absorber is covered by **a 12-month warranty**.
