

**OCHO NAILS** is a unique brand focusing on professional products for nail stylists. The product range includes hybrid polishes, gels, professional lamps and nail care accessories. **OCHO NAILS** products will meet the requirements of experienced users and beginners alike.

OCHO NAILS

## X13 UV/LED LAMP

PROFESSIONAL USE

### Device for the perfect manicure

Ocho Nails X13 mirrored bottom nail lamp is a device that enables you to easily perform manicure and pedicure treatments using hybrid polishes, gels or other light-curing preparations. Evenly distributed diodes and Dual Led technology guarantee perfect fixation of nail design. Minimalist design, ease of use, and useful functionalities make the lamp perfect for both professional and home use.

## PERFECT STYLING FIXATION

DUAL LED TECHNOLOGY

### Shadowless lamp with Dual Led technology

**36 precisely positioned LEDs** ensure perfect curing of gels and hybrid polishes, eliminating the risk of the so-called dead zone. The **closed design**, called a booth, allows for more precise and faster curing of nail designs. Thanks to Dual LED technology, **the diodes emit light at two wavelengths**, reducing eye fatigue and extending the device's range. The mirrored bottom reflects light evenly, **speeding up and optimizing the curing process over the entire nail surface**.

These features make it easier to properly cure even the most demanding products, allowing access to harder-to-reach areas of the nail plate.

## DISPLAY WITH FOUR TIME MODES

10 S / 30 S / 60 S / 99 S

### Adjust the working time to individual needs

The lamp is equipped with a **timer with four pre-programmed operating times**: 10 s, 30 s, 60 s, and 99 s (the so-called "Low Heat Mode"), which are counted down on a clear digital display. A built-in **motion sensor** automatically activates the lamp when a hand or foot is placed under it, using **120 s as the maximum exposure time**. This function works when no mode is selected, and the display shows the passing curing time. This allows **freedom in selecting the curing time** for the styling being performed.

## PREVENTS BURNING SENSATION

LOW HEAT MODE

### Low Heat Mode

When the **Low Heat Mode** is activated, the lamp heats up gradually, slowly increasing its power, **preventing the sensation of burning or heat** during curing. This feature is **especially useful for curing gels**, which often cause discomfort when using other lamps available on the market.

## EASILY REMOVABLE BOTTOM

IDEAL FOR PEDICURE

### Minimalistic design and functionality

Carefully selected features and **minimalistic housing** made of durable plastic make the lamp both an elegant and highly practical piece of salon equipment. **Easy to clean and resistant to damage**, the lamp is appropriately sized to comfortably fit an entire hand or foot during treatment, ensuring **fast and even curing of nail designs**. The removable, magnetic bottom allows for easy pedicure treatments and **simplifies cleaning and disinfecting the device**, further enhancing comfort and hygiene.
