

SILLON

beneficial solutions for each salon

The **Sillon** brand was established as a response to the constantly increasing expectations of users. The equipment in offer, such as functional cosmetic chairs, is distinguished by good quality and, at the same time, affordable price.

remote control

*the chair has
height adjustment,
backrest and footrest,
as well as the ability to
unfold to the recliner position*

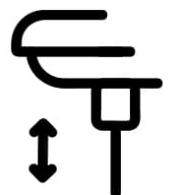

Multifunctional, impressive equipment

The Sillon Classic electric cosmetic chair is distinguished by its simple appearance, intuitive operation and versatility. It is equipped with **3 actuators controlled by a wired remote control**. It is distinguished by an ergonomically profiled seat and **the ability to adapt to individual needs**, making it perfect for many specialist offices.

practical solutions

*unfolded chair reaches
a length of 2 m, and
the seat height is adjustable
within the range of 23 cm*

Easy control with remote control

Using an **easy-to-use remote control**, the chair adjusts smoothly **in 3 planes** – it is adjustable in height, backrest and footrest. The seat height can be adjusted **from 61 cm to 84 cm**, and when fully extended the chair **reaches a length of 2 m**. These dimensions allow the equipment to be easily used by people of different heights and allow it **to be adapted to the current treatment and individual needs**, which affects both the comfort of the user and the person performing the service. The handles located on both sides of the seat allow the remote control to be hung up so that it is always at hand.

pull-out headrest

the opening in the headrest and the cushion make it easier to perform cosmetic procedures

Functionalities for comfortable use

The extendable headrest helps customize the equipment for users of different heights, providing **stable head support** during treatments. It is also possible to **adjust the extension of the footrest**, which is especially useful during treatments performed on taller people, providing them with better support. **The armrests are movable within 180°**, which facilitates taking a seat in the chair and provides comfortable access for the person performing the procedure. **They can be easily and quickly removed if necessary.**

removable armrests

facilitate efficient taking seat, movable in the range of 180°

Ergonomically profiled seat

The **wide seat** will ensure comfort during long treatments. The appropriate way of shaping the foam gives the chair **an ergonomic shape**. It allows the body to be comfortably positioned in it, ensuring high comfort and **adequate support for the spine**. The equipment can be unfolded **into a couch position**, and thanks to **the opening in the headrest** hidden under the pillow, it is also perfect for back treatments or massages.

**good
quality**

*used materials ensure
ease of cleaning and
durability of the product*

**synthetic
leather**

Elegance and functionality

The chair is filled **with contoured foam** and covered with **pleasant-to-touch synthetic leather** in shades of white. The material used makes the equipment **easy to clean, as well as resistant to moisture and selected disinfectants**. A solid base made of durable material in shades of white ensures stability during treatments. Properly profiled hems give the chair a stylish look and make the seat ergonomic. **Minimalist, simple design and classic colors** allow it to fit into any interior.
