

MORE POSSIBILITIES

EXO is a brand that supplies top-quality products for the cosmetology and podiatry sectors. It is characterised by its exceptional commitment to developing its product range, with a focus on meeting customer needs. Its professional equipment and accessories, including nail drills, significantly enhance working comfort thanks to their high-quality construction.

PROFESSIONAL NAIL DRILL EXO FLUX

Precise nail plate preparation
and quick product removal.

Professional manicure and pedicure drill

The **EXO Flux** is a versatile nail drill fitted with a brush motor, which is ideal for carrying out manicure and pedicure treatments. The device **allows for quick and precise shaping of the nail plate and cuticles**, as well as the removal of residue from previous treatments. Adequate power, stable operation and an ergonomic design **allow you to carry out a variety of treatments efficiently**, ensuring comfort during both shorter and more demanding sessions.

TWIST-LOCK HANDPIECE

Quick drill bit exchange and reduced hand fatigue.

Secure the drill bit before starting work.

Ergonomic head with Twist-Lock system

The contoured head **ensures a secure grip** and full control when performing precise movements. Its ergonomic design and optimal balance **reduce hand fatigue**, which is particularly important during long working hours. The **Twist-Lock system** enables quick and convenient bit changes without the need for additional tools. This solution **streamlines the preparation of the device for use** and allows for a smooth transition between the successive stages of the procedure.

TOUCH PANEL

Speed adjustment up to **35,000 RPM** and direction change with pause function.

Intuitive touch panel and precise speed control

The modern touchscreen panel **provides convenient control over** the device's key functions. The **speed control allows the rotation speed to be adjusted up to 35,000 RPM**, making it easy to tailor the operating parameters to the type of treatment being performed and individual preferences. **Smooth reversal of rotation direction with a pause function** allows you to switch operating modes safely, **increasing control over the device** whilst performing the various stages of the procedure.

MODERN DESIGN

Built-in drill bit storage
and anti-slip base.

Sturdy construction and modern design

The minimalist white-toned casing **blends perfectly with modern beauty** and podiatry **treatment stations**. The durable plastic **ensures resistance to daily use** and makes the device easy to keep clean. **The built-in storage compartment for cutters** keeps your most frequently used accessories within easy reach. This keeps the treatment area tidy and makes preparing for the next stages of the treatment more efficient and comfortable. **Non-slip elements prevent** the drill from sliding during use, **ensuring safety and comfort**. The flexible, coiled head cable extends to approximately 150 cm, **guaranteeing freedom of movement**, whilst the power cable, over 130 cm long, makes it easy **to position the unit comfortably at the workstation**.
