The **Saeyang** brand offers a range of high-quality tools designed for professional manicure and pedicure treatments. Saeyang products, highly regarded amongst beauticians, are characterised by excellent build quality, precision and the use of innovative solutions.

MARATHON ECO 450

- foot pedal
- handpiece holder

Professional manicure drill

The Saeyang Marathon Eco 450 is a professional manicure and pedicure drill, designed for intensive use. Its robust base, combined with the high-performance SH37L(M45) head, **ensures efficient nail and cuticle preparation, as well as** the performance of demanding podiatric treatments. **The ergonomic design and smooth adjustment of settings allow you to** comfortably tailor the machine's operation to your current needs. As a result, the drill is well-suited to beauty salons and clinics **where efficiency, precision and comfort** during many hours of use **are essential**.

SH37L(M45) HANDPIECE

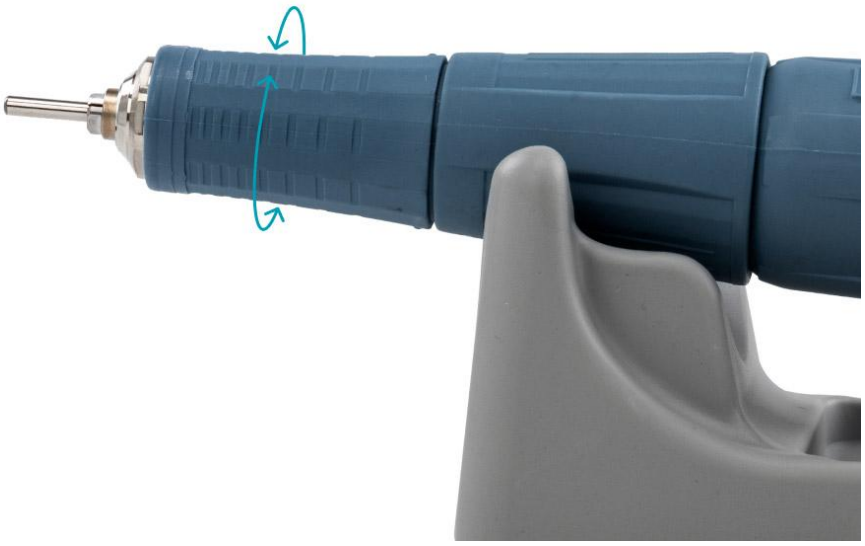

- speed: **40,000 rpm**
- torque: **4.5 N·cm**
- cable length: **150 cm**

Precision SH37L(M45) head

The SH37L(M45) head ensures high precision and comfort when performing manicures, pedicures and podiatric treatments. **The speed, adjustable from 0 to 40,000 revolutions per minute, and** a maximum torque of 4.5 Ncm allow **for efficient nail and cuticle care**, as well as more demanding procedures. **The contoured head** fits comfortably in the hand, ensuring comfort even during longer treatments. The flexible coiled cable ensures high working comfort, **reaching up to 150 cm in length** when fully extended.

TWIST-LOCK SYSTEM

easy cutter replacement in one motion

Quick bit replacement thanks to Twist-Lock

The head is fitted with **the Twist-Lock system**, which allows for quick bit changes without the need for additional tools. Simply turn the mechanism to unlock the head and attach the selected tool. Simple operation **streamlines the preparation of the device for the next stage of the procedure** and allows it to be efficiently adapted to current needs.

PRECISE CONTROL

the knob allows smooth speed adjustment, while the button changes the direction of rotation

Intuitive operation and convenient controls

The dial on the base allows for **smooth adjustment of the rotational speed**, enabling you to precisely tailor the operating speed to the type of procedure being performed. A button located at the front of the device allows for convenient reversal of the rotation direction. **The smooth change in rotation direction**, accompanied by a brief automatic pause, protects the motor from sudden shifts between rotation directions. The FOOT/HAND button **allows you to switch between manual control and foot-operated control**. This feature **offers greater freedom** during manicures, pedicures and podiatry treatments, and allows you to tailor the device's operation to your individual preferences.

ADDITIONAL PROTECTION

overload protection stops the device, while the **RESET** button allows you to quickly resume operation

Additional protection for the device

The overload protection safeguards the mill's components in the event of excessive load during operation. When the system is triggered, the device **automatically stops operating**, reducing the risk of further overload. It is restarted using the RESET button, **allowing you to quickly resume work once** the cause of the overload has been removed.

PRACTICAL SOLUTIONS

the nail drill base can also be positioned on its side, allowing better use of the available workspace

Practical solutions for the workplace

The included silicone stand allows **the head to be safely set aside during treatment**, reducing the risk of it accidentally falling and becoming damaged. **An additional plastic holder provides** convenient storage for the handpiece, and the option to attach it in two different positions allows you to adjust its placement to suit the layout of your workstation. The milling machine base **can also be positioned on its side**, allowing for better use of available space and enabling the device to be arranged to suit the workstation.

STABLE DESIGN

anti-slip feet ensure stable positioning of the nail drill on the worktop

Functional design of the nail drill

The sturdy base and precision head form a functional set for efficient treatment of nails, cuticles and more challenging areas. **Non-slip feet** ensure the machine sits securely on the worktop, minimising movement during use. The well-thought-out design **also performs well during prolonged use**, ensuring comfort and tidiness at the workstation.
