Professional solution

The Handy 700 prosthetic nail drill machine offers **high power of 100W** and quiet operation. It provides **high speed up to 50,000 revolutions per minute**. Working with this nail drill machine is extremely comfortable due to the fact that a noise reduction system was built into the micromotor of the handpiece, reduced by 20% compared to conventional models. The control box of the machine has an ergonomic shape, it has a practical handle for transport & a handpiece holder.

BM50S1

Speed:

50 000 rpm

Max. Torque:

7,8 Ncm

Functionality you will like

It has exactly what you expect from the best nail drill machine. You can choose between an adjustable knob speed control and a foot drive with built-in speed control (included), which makes your work very easy. The AUTO-CRUISE function allows the foot controller to be set to constant speed if necessary. The brushless handpiece also allows a low speed of 1000 rpm. The second port offers the possibility of working with another handpiece and an efficient tool change without the need to switch cables. The self-diagnosis function built for supervising the correct operation with locating the defective area displaying the appropriate code on the digital display. The included stand makes it easy to take a break and to secure the handpiece.

- Self-diagnosis function
- Port for second handle
- Foot drive

Twist-Lock: Easy bit change

Forget about using keys and spindles, the TWIST-LOCK handle is a solution that allows you to quickly and easily change the bit with one move. Turn left to unlock, loosen and replace the bit. Turn right to close the lock and attach the bit.
